

10 Meter Rag chew Net Preamble

CQ CQ CQ Calling the Batesville Area Radio Club 10 meter Rag chew net. This is _____ my name is _____. I am located in _____, Ar. I will be your net control for tonight. We meet each Thursday night at 8 P.M. CST for several reasons, to test our equipment to practice our skills in checking into a net and to develop and promote fellowship between amateurs in and around our area and around the world. All licensed amateur operators from any where are welcome. We want to welcome our shortwave listeners tonight also.

This is an open forum net and we talk about anything that's on your mind with the idea of promoting the use of 10 meters, by having a place we can all come to and enjoy great fellowship.

When you check into the net give my call sign, _____, then un-key. If you hear no other stations then proceed with your call sign followed by your name and location. Please, always give your call sign slowly and phonetically.

If emergency traffic should arise during the net you should break into the net at any time using the call BREAK BREAK or EMERGENCY followed by your call sign you will then be recognized and authorized to give your emergency information immediately.

At this time I will take any emergency or priority traffic, please call _____.

Hearing none, at this time, are there any stations that have any special announcements for the net, please call _____.

Are there any stations that need to come in short time call _____ and I will get you on the list then take short time comments. However we do encourage everyone to hang around and participate.

Now we will begin our regular check ins. All properly licensed amateur radio operators are welcome to check into the net Please call _____.

Here is the list of the stations as I have them that have checked in so far, _____; are there any corrections _____; are there any relays.

This is _____ with the BARC rag chew net.

Are there any more check ins please call _____; are there any relays?

If there are no more check ins at this time, then the frequency is now open for every station to express what is on their mind. At this point, net control can begin a discussion on anything and get the net going. Net control needs to be a leader in starting a discussion.

Identify the net every 10 minutes and have stations identify also, call for more check-ins and get them into the net also.

I would like to thank each of you for checking in to the BARC rag chew net at this time-----P.M. CST I will close the BARC rag chew net and return the frequency to normal operations 73's to each of you this is _____ monitoring.
