

# 10 Meter Monday Night Net

CQ CQ CQ Calling the BARC 10 meter community net. This is \_\_\_\_\_ (give call sign phonetically) my name is \_\_\_\_\_. I am located in \_\_\_\_\_, Ar. I will be your net control for tonight's net. We meet each and every Monday night at 9 P.M. CST for several reasons, to test our equipment, to practice our skills, and to develop a fellowship between amateurs in and around our community and the world. This is a directed net and stations need to respond only when directed by net control.

When you call into the net give my call sign, \_\_\_\_\_, then un-key. If you hear no other station, then proceed with your call sign followed by your name and location. Please give your call sign slowly and phonetically.

If emergency traffic should arise during the net you should break into the net at anytime using the call BREAK BREAK followed by your call sign and you will be recognized and authorized to give your emergency information immediately. **(It is important for net control to keep moving and not wait more than a few seconds for responses.)**

At this time I will take any emergency or priority traffic please call \_\_\_\_\_.  
Hearing none, are there any stations that have any special announcements for the net, call \_\_\_\_\_.

Are there any stations that need to come in short time, call \_\_\_\_\_ and I will get you on the list. At the end of short time check-ins I will return to take comments from them.  
Comments from short time check ins.

Now we will begin our regular check ins. All properly licensed amateur radio operators are welcome to check into the net Please call \_\_\_\_\_.

**(Pause from time to time as needed to acknowledge check ins and make corrections.)**

Here is the list of stations as I have them that have checked in so far are there any corrections; then check for any relays.

This is \_\_\_\_\_, with the BARC 10 meter community net. Are there any more check ins? Please call \_\_\_\_\_; are there any relays? **(Remember to identify the net every ten minutes or less and give stations a chance to identify also.)**

If there are no more check ins, I will proceed to the list for comments. **(Go down the list as you have it.)**

Are there any more check ins Please call \_\_\_\_\_; are there any relays.

Any further check ins or comments for the net before I close?

I would like to thank each of you for checking in to the BARC Community 10 meter net at this time -----P.M. CST I will close the Batesville Amateur Radio Club Community Net and return the frequency to normal operations 73's to each of you this is \_\_\_\_\_ monitoring.
